Chief,
Tshekedi Khama,
P.O. Serowe,
Via Palapye Road.
B.P.

Dear Sir,

I am in receipt of your letter of dated 21st instant - and am glad, you will take advantage of my offer of the 3rd instant

I believe you are experiencing some difficulties, out at Nata, at present - but have given the job out to Mr Cavanagh - and am awfully sorry to say - Mr Cavanagh knows very little, if anything at all, about Cement a Concrete work - I seen it

I just heard he wanted about 40 pockets cement to close cracks in circular reservoir - or to put a new floor in. -

I could build you a reservoir with that amount - (of Cause with stone) & cement plastering

I have build a circular reservoir

KMM 1 TKP 192

it holds about 35 thousand gallons on the farm here 5 years ago and it still stands - Recently about 9 months ago - I built one for Modise Bake, one of yours men, at Shashi Siding.

It holds about 2500 gallons of water and I used 12 pockets cement only.

So whenever your men, call on me I shall give the matter immediate attention - as I said before "free of charge" and you can rest assure - it will be a good job.

Yours Faithfully

H. C. Coetzee
